- 1. Measure and sketch the room & floor space according to your scale marked above.
- 2. Mark the location and dimensions of cabinets, bathtub, shower, toilet, refrigerator, floor vents, floor drains, support column/pillar, protruding/pony walls and any other fixtures, appliances and obstacles that will not be heated under.
- 3. Include the total floor space and we will subtract from that the unheated perimeter.
- 4. If you do not plan to heat all of the open floor space, then measure and mark the areas to be heated.
- 5. Fax to: 847-279-3800 or email to <u>sales@thermosoft.com</u>.
